^ In warm, dry conditions, or in direct exposure to the sun, addition of Floetrol® may be necessary for exterior use to maintain a wet edge.

* Coverage depends on substrate porosity and texture and wastage factors.

EcoStyle Paints comply with the VOC limits in APAS specification 0215 "Interior Latex Paint, Low Odour, Low VOC"

- All paints are low odour and dry paint films are all odourless.
- All EcoStyle paints have Sensitive Choice Approval by The Asthma Council of Australia for interior & exterior use and are classed as Zero VOC. This approval is valid when used untinted or when tinted using the ROCKCOTE Tinting System. This gives EcoStyle paints the edge over other commercially available products which are only classified as Zero VOC when used untinted. Refer to the document, ROCKCOTE VOC Comparison Chart.
- All EcoStyle paints are certified under the Australian Ecolabelling Program (Good Environmental Choice Australia) "GREENSTAR" when untinted or tinted with the ROCKCOTE Tinting System.
