

ROCKCOTE System Performance Codes

For quality exterior coatings that are right for the job and right for the client every time.

<u>PERFORMANCE CODES</u>	<u>SUGGESTED USE</u>	<u>KEY FEATURES</u>
Code 5	<ul style="list-style-type: none"> Quality buildings requiring low maintenance Highly exposed areas, e.g. beachfront & high rise 	<ul style="list-style-type: none"> Most durable Systems Greatest flexibility (crack resistance) Low maintenance Highest level of water repellence High resistance to dirt & mould pickup Vapour permeable
Code 4	<ul style="list-style-type: none"> Quality buildings requiring low maintenance Highly exposed areas, e.g. beachfront & high rise 	<ul style="list-style-type: none"> Lower micron film build than Rating 5. Good flexibility Similar performance to Rating 5 in low maintenance, water repellent, High resistance to dirt & mould, Vapour permeable
Code 3	<ul style="list-style-type: none"> Standard housing and walk up construction 	<ul style="list-style-type: none"> Ideal for standard housing Aesthetically acceptable Adequate performance for all standard construction Low maintenance
Code 2	<ul style="list-style-type: none"> Standard housing and walk up construction where low water repellent coatings are acceptable 	<ul style="list-style-type: none"> Long life, economical coating with attractive flat finish Pigmented trowel-on, no paint required Low water repellence May require more general maintenance than System Codes 5,4&3. (incl washing down every twelve months)
Code 1	<ul style="list-style-type: none"> Standard housing and walk up construction where low water repellent coatings are acceptable 	<ul style="list-style-type: none"> Stylish aesthetics capable of covering imperfect render High build roll-on coatings for economical flat finish Flexibility & crack resistance not as effective as Ratings 3 & 2 & well below Ratings 5 & 4 May require more general maintenance than System Codes 5,4&3. (incl washing down every twelve months)
