

Technical Data Sheet

ROCKCOTE SMOOTH SANDING PATCH

Effective From 20 Nov, 2018

ROCKCOTE Smooth Sanding Patch is an ultra fine ready mixed, water based, easily sanded acrylic patching compound, showing negligible shrinkage in one application. It is designed for patching holes, form joints & minor imperfections in concrete or masonry walls. ROCKCOTE Smooth Sanding Patch can also be used to create a smooth finish over inconsistent substrates prior to painting.

Features

- Easy to use.
- Exhibits minimal shrinkage.
- Excellent adhesion qualities.

Benefits

- Tough
 - Interior/Exterior* use
- *External applications require the addition of GP cement powder (refer to Application).

Uses

- Designed for patching off form concrete joints and minor imperfections.
- Can be used over ROCKCOTE Patch & Prep on fibre cement sheeting joints for a finer finish.
- Can be used as a top coat over ROCKCOTE Quick Render to provide a smooth flat finish.
- Can be used interior and exterior.

Colours and Gloss

Not generally coloured, but can be tinted to a range of light to medium depth colours. NB exact colour accuracy cannot be guaranteed, please allow for slight variation when making colour selection.

Sheen Level

Coverage Rate

15m²/15ltr @ 1mm build
Approximately 15 square metres per 15 litre pail @ 1mm build

Application Method

Trowel

Dry Film Build

Wet Film Build

For best results, do not apply greater than 2mm wet film build. Use multiple coats for higher build.

Typical Data at 25°C and 50% Relative Humidity

Drying Time 4 hours
Touch Dry 1 hour dependent on temperature, humidity and film build.
Dry to Recoat 4 hours dependent on temperature, humidity and film build.

Usual No Coats Suitable for multiple coat application.

Technical Data Sheet

ROCKCOTE SMOOTH SANDING PATCH

Effective From	20 Nov, 2018
-----------------------	--------------

Substrate Conditions

- Must be applied over properly prepared substrates that are free of dirt, dust and any other contaminants.
- All substrates must be installed as per manufacturers' specifications prior to application.

Application

- Mix contents of pail before use.
- For external applications, mix 3kgs of lump free cement powder with 1 - 1.2L of cool, clean water to create a slurry. Add this slurry slowly to a 15L pail while stirring. Ensure all lumps are stirred through prior to application.
- For larger patching imperfections in concrete, wet down the wall and once the sheen has receded apply ROCKCOTE Patch & Prep or Skimcote to the area and flush off whilst damp then apply ROCKCOTE Smooth Sanding Patch once cured.

Precautions and Limitations

- Not for use on fibre cement joints as a taping compound.
- Should not be applied in temperatures below 5°C or above 35°C.
- Should not be applied over glossy silicone based paints or sealants.

Transport and Storage

- Store in a cool dark place.
- Keep pail sealed.
- Do not stack over 3 high.

Disposal

- Dispose of in accordance with local council regulations

Safety Data

Refer ROCKCOTE Smooth Sanding Patch SDS.
